Assignment 12

Assignment 2 on File I/O

Patil Rohit Kalyan

Roll no:2201149

Que: Write a program in Java to copy the contents of one file into another.

```java
import java.io.*; class

CopyFile

{

    public static void main(String[] args)

    {

try

        {

                BufferedWriter bw=new BufferedWriter(new FileWriter("sup-copy.txt"));

                BufferedReader br=new BufferedReader(new FileReader("sup.txt"));

                String s;

                while((s=br.readLine())!=null)

                {
```

```java
                System.out.println("file copied successfully!!");
        bw.write(s +"\n");

            }

            br.close();

bw.close();

        }

        catch(Throwable e)

        {

                System.out.println("file not found ");

        }

    }

}
```

Output:- file copied successfully!!"

File 1:sup.txt

Hello how are you!!

File 2:sup-copy.txt

Hello how are you!!
