```java
import java.util.StringTokenizer;

public class StringTokenizeExample {
    public static void main(String[] args) {
        String str = "we are doing Java practical";

        // create a new StringTokenizer object with the given string and delimiter
        StringTokenizer st = new StringTokenizer(str, " ");

        // iterate over the tokens and print them out
        while (st.hasMoreTokens()) {
            System.out.println(st.nextToken());
        }
    }
}
```

Output

we

are

doing

Java

practical
